

THE GLEICHEN CALL

VOLUME XXVIII NO. 23

GLEICHEN, ALBERTA, WEDNESDAY AUGUST 22, 1934

SUBSCRIPTION \$2.00 PER YEAR

ACTIVITIES OF THE GLEICHEN BRANCH U.F.W.A.

The regular meeting of the Gleichen U. F. W. A. was held at the home of Mrs. Robt. Oliver, Thursday, August 10th. Notwithstanding the very busy time on the farm at present there was a very good attendance which shows the ladies are very much alive and keen to support their organization.

President, Mrs. J. C. Buckley, had the chair and dispensed with the regular routine business in a quick order. Much interest was expressed over the severe illness of one of their members, Mrs. Addison Wilson, and an order to express their best wishes to her with flowers was given.

A very pleasant picture was shown, but the meeting was very disappointed that Mr. Duncan McLean was unable to be there and give his paper on "Pictures in the Home" as they always look forward to Mrs. McLean's paper. Miss C. Burne read a book review. Mrs. J. C. Buckley conducted a button hole contest, the award for the best made button hole going to Mrs. Robt. Burne. After the meeting the members were refreshed with a very dainty lunch.

The next meeting will be held on August 30th, at the home of Mrs. R. B. Hayes. A good attendance is especially desired as an excellent speaker, Mrs. W. Ross is expected to address the meeting.

MAN ACCIDENTLY KILLED AT NAMAKA SATURDAY

Saturday afternoon at Namaka, Fred Bystrom was instantly killed when a large piece of cement fell on him. He was engaged in excavating the ground around a large cement block used as the base for an elevator when the ground supporting the foot thick slab suddenly gave away. Twenty in weight, it pinned the helpless man beneath it before he had any opportunity to escape. It was some minutes before he could be extricated. R. C. M. P. from Steinbach, and the coroner inquest into the fatality and decided an inquest was necessary. According to police reports Bystrom was of Swedish nationality and was 38 years of age. It is stated that all his relatives reside in Sweden.

LOCAL MEN SUFFER FROM ACCIDENTS

Dan MacDonald, the local blacksmith had his eye injured by a piece of steel getting into it. He had a pretty sore eye for a few days.

Dave Yule sprained his ankle badly when he stepped off a bridge. He is now getting along as well as can be expected.

Dan McLeod met with a nasty accident Monday afternoon. He was lifting a heavy piece for a combine when he slipped and fell. In falling the heavy iron he held in his hands came down on his back and his leg took it open. Mr. Farnham tenderly held and found it necessary to put in five stitches to close up the wound. Dan is now using crutches and hopes to be about his work again in a short time.

There never was a time when farmers were more alive to the desirability of the use of good seed than now, stated W. T. Weiner, secretary of the Canadian Seed Growers Association, on a recent visit to Alberta. Last year the association was sold out of seed by the middle of March, said Mr. Weiner.

Under contracts already awarded, some 150 miles or more of graveling and re-graveling of existing highways have been completed, according to a progress report issued by provincial public works department. This work is proceeding in some 27 sections of main highways in different sections of the province.

A yield of 554 bushels of barley from 45 acres, an average of 72 bushels per acre, was reported from the Smith farms, just east of Lethbridge. The crop was grown from four bushels of Elite strain of Trebi barley and weighted 55 pounds a bushel.

News Items of Local Interest

W. Harrison is at present visiting at the coast.

At Shouldice Friday threshing was in progress. We do not know if this was the first outfit to get going this year in that district.

The women folks are having a warm time these days canning pickles of all kinds. Hap is the man who has a job to hold down instead of having to hang around the house.

Wm. Cranfield of Toronto spent a day in town last week visiting relatives. He reports business somewhat better in the east.

Wm. Schmidt is improving his service station with a nice fence, which is being installed by Clifford Thompson. When Mr. Schmidt gets through fixing up his premises he will have a very attractive service station.

Residents over the town who are interested in beautifying their premises report that now and again they are sadly handicapped in their work by the presence of stray hawks. While we are poultry boosters we do not believe in allowing the chickens to run on our neighbors. Chickens do not belong in gardens or flower beds, and owners should have respect for the rights of their neighbors. The hen is a great institution but only when under control.

R. G. Ady of the Home staff, left last weekend for his farm at Gilbert Plains, Manitoba, where he will operate his threshing outfit for the harvest season. He will be away about two months.

Mr. and Mrs. W. F. Durston of Queenstown spent an afternoon in Gleichen visiting W. W. Brown. While here Mr. Brown showed them his magnificent garden and their great delight. Before leaving Mr. Durston stated that his garden in Queenstown, his year was an absolute failure owing to lack of rain. He added that a wished he had brought on his arrival.

Estimated estimates of acreages in various grain crops in Alberta have been issued this week in company with those of other provinces, by the Dominion Bureau of Statistics. The figures for Alberta are as follows: wheat 7,601,000 acres compared with 7,089,000 last year; oats 2,870,000 acres, barley 749,000, rye 235,000 and flax 18,100.

Now ladies and gentlemen allow us to introduce you to Mr. Adolph Gutsch, superintendent of the Harrison Department store, and a popular young man about town. Adolph was astounded Friday to get a telegram that he had won a pot of money in a sweepstakes. He invested a fifty cent piece and it returned to him increased in value by a couple of thousand times. Gleichen sports have in the past spent a lot of money on sweepstakes and we are glad to see some of it coming back. Well, here is good luck Adolph, and may some of your dreams come true.

Establishment of a wool scouring plant, valued at \$50,000, capable of handling the bulk of Alberta's annual wool clip, is now assured for the province, according to authoritative information that is available in Edmonton. Just where the plant will be located is not yet decided. Four locations are being considered by the eastern firm handling the proposition, namely Edmonton, Calgary, Lethbridge and Medicine Hat. One of the main considerations is proper railway facilities for both loading and outward shipments. The annual wool clip of the province runs between 3,500,000 and 4,000,000 pounds. The largest proportion is produced in Southern Alberta, but there are a number of important producing areas in the central and northern parts of the province. It is stated that the financial arrangements for the plant have now been completed, and that installation can be commenced as soon as a definite location is arranged. The proposition is being closely studied by the government.

There will come a time in the history of this country, and it is approaching rapidly nowadays, when a young person without a high school diploma is going to find things pretty hard in this life. For education is the stepping stone to success and intelligence and without it all is slush labor and interminable discouragement. Those who enter upon high school life are to be congratulated. They are marching over a royal road and paving their own life's highway so that progress will be smooth and sure.

SMALL NUMBER OF EXHIBITS AT FLOWER SHOW

The flower show held last Saturday in the old Post Office block was very disappointing, as far as the number of entries was concerned. Out of the entire town there were only 14 entries.

With over 100 gardens in town growing flowers, this was a very poor showing and shows lack of co-operation on the part of the citizens. There is probably no town in Southern Alberta the size of Gleichen which can boast of more attractive gardens and the citizens generally are very proud of them and yet it seems impossible to get them interested to the extent of sending in some small entries once a year to show others just what can be done in our town.

Apart from this there were only about twenty-five townspeople who were officially interested to visit the display.

As a result of this lack of interest, it is doubtful whether it is worth while arranging for an exhibit next year. The committee wish to thank all those who sent in entries and also to the following: Mr. E. Parkin and Mr. S. E. Dafne for the use of the store for the exhibits. The Canadian Legion for use of their tables and to the young ladies who gave their time to see several dead skunks and at the same get a smell as only a skunk can give.

The town had a vacant looking appearance Monday when all the combines were gone. The yards where they stood have for sometime past been a hive of activity with many people working on them for the season. Dan Macdonald, the local smithy had his hands full doing repair work for the owners of the combines and he now has a little more time to attend to other people. Wm. Schmidt sent out one machine and W. Suttermister two.

Limitation of business is what we need in the summer time. Certain lines will profit by vacation, while others will lag, unless and until realized that healthy stimulation can be injected to tide over the summer months. Business men themselves should have vacation. This is the time of year when provided they have the extra grain of energy necessary to make up the difference between the financial expenditure of a vacation and what profit would have resulted, if any, had they remained at home on the job. In times of dullness prepare for better times.

Satisfactory production of broom corn for use in the manufacture of brooms has been established on the irrigated section surrounding Taber, in southern Alberta this season. Some 400 acres have been grown under contract with a firm at Regina, which will utilize the material. The crop was recently inspected by officials of the concern and found to be in excellent shape. Some of the crop stood as high as eight feet.

ENTERING HIGH SCHOOL

Thousands of young men and young women (they aren't boys and girls after they get out of public school) will enter high school this year, and if they are the right kind of people they will get the right kind of thrill from this experience.

Entering high school is an epochal event in the life of everyone who is blessed with the opportunity. Most students never get beyond the graduation period in the high schools. After that they either go to work or do a little of each.

A great many young people who enter high school never graduate, and that is a very sad mistake for them to make, and still a greater mistake on the part of the parents, providing the latter deliberately gave their consent to a child leaving high school without graduating, when it is not necessary.

The first day in high school marks the beginning of an important event in the life of the young man or young woman who enjoys the privilege of acquiring this important education.

There will come a time in the history of this country, and it is approaching rapidly nowadays, when a young person without a high school diploma is going to find things pretty hard in this life. For education is the stepping stone to success and intelligence and without it all is slush labor and interminable discouragement.

Refined Gasoline CRYSTAL CLEAR AND ODORLESS FOR 15c per gallon

Plus tax, F.o.b. our Gleichen Warehouse. Elimination of costly duplicate handling whereby we haul direct from the Calgary refinery, makes a big saving which is passed on to our customers in the above price per gallon.

We also have ROYALITE NAPHTHA from Turner Valley, which is the best produced from that district at 12½c per gallon plus tax

To Stimulate Objective Thinking

The topsy-turvy condition in which the world finds itself to-day, naturally leads to serious thought on the part of everyone. Why should there be so much penury and want in the midst of a surplus of commodities? What are the real causes of stagnation of trade the world over. One hears that the capitalistic system is doomed, and out of the present chaotic conditions a new order is bound to be established. Many theories are being continually advanced, designed to establish a new Utopia. The history of the world establishes the fact that these theories are necessarily wrong. There can be no rapid realization of many obviously needed changes in our social system. But the world does not stand still, a forward and not a backward movement is inevitable. The encouragement and not the suppression of constructive thinking and expression of thought would be of material assistance. In the annual address of Principal Fife of Queen's University, reference was made to the stimulation of thought by means of discussions in the class rooms. He is reported in part as follows:

"In our academic seclusion we sometimes catch from a busier world the echoes of an accusation that the Universities of Canada are becoming 'nurseries of anarchy and revolution.' So far as such charges have any basis except hysteria, they may serve to encourage us, for they seem to indicate that students are in some measure acquiring the art of looking at both sides of disputed questions, an art in which it is our duty to encourage them. The ideal of suppressing enquiry and free speech, which has for the moment established a tragic dominance in many parts of the world, is nowhere more absurd than in a University, where men and women gather to exercise their faculties of curiosity and logic. Those faculties in them are necessarily immature; their utterances are often crudely dogmatic. But to stifle thought and utterance would be in a University the basest treason. As Penn said: 'Whoever is right, the persecutor must be wrong.'

"If we are to stimulate in our pupils objective thinking, we must be equally free in speech and thought ourselves—but not equally rash. Propaganda is not a part of a teacher's proper function. He is not concerned to produce opinion, a temporary state of conviction which can be quickly changed by counter-propaganda. His aim is to stimulate the growth of intelligence, the power of detached judgment. To that end he may exercise in the class-room every art of sophistry, but if he blinks his way into the outer world, where opinions clash unashamed both from fact and reason, it behoves him to remember what astonishing weight that world attaches to a professorial pronouncement. The dignity of the University stands beside him on the platform, sternly demanding judicial sobriety. A University teacher should certainly be clever; he needs to be wise; and of the factors of wisdom not the least are self-restraint and kindness and patience."

Appoint Commission

To Inquire Into Claims Of Alberta For Further Resources Com- pensation

Hon. Andrew K. Dystar, judge of the Manitoba Court of Appeal, a bench; Hon. Thomas M. Tweedie, judge of the supreme court of Alberta, and George C. Macdonald, Montreal, have been constituted a commission to inquire into claims of the province of Alberta for further compensation with respect to the administration and control of its natural resources. Announcement of the appointment was officially published recently. Mr. Justice Dystar is chairman.

With the exception of Mr. Justice Tweedie the commission is the same as that which investigated similar claims on the part of Saskatchewan recently. On the completion of the Alberta report the commission will render to the federal government joint recommendations on behalf of both provinces.

Chinese Form Of Torture

Used Skin Of Rhinoceros To Crush Political Prisoners

The ancient Chinese had some strange uses for the rhinoceros, according to a report by an American archaeologist. One form of torture was to wrap a political prisoner in the hide of a freshly killed rhinoceros. As the hide dried it contracted and slowly crushed the victim. Another use the ancient Chinese had for rhinoceros skin was for covering funeral cars. Also the armour of the bronze-age warriors was made of it.

Once upon a time the good died young.

But since goodness became a virtually obsolete virtue, the careless have been dying young, instead.

Cigarettes in their modern form

were introduced into America and Europe about 65 years ago.

Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Colic, Cramps, Burns in the Stomach, Stomach Complaints, Ulcers in the Bowels, do not waste valuable time but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you.

The power of this remedy has been on the market for the past 30 years. Proof enough that you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side.

Gold Pouring Into London

Great Increase In Foreign Deposits Of Precious Metal

The golden tide, unexampled in the history of the world's monetary movements, continues to pour into London.

It began a year ago with a gold influx at the rate of \$25,000,000 weekly, then it increased early this year to \$62,000,000 weekly, and now it averages 45 millions weekly and shows no indication of declining. As soon as gold arrives in England from South Africa, Canada and other producing countries, it is bought by French, German, Dutch and American can banks, and the general financial state of affairs in these own countries, and stored away uselessly in the vaults of London banks, where they know it cannot be touched. Already in the square mile that constitutes the city of London more precious metal has accumulated than ever King Solomon's legendary mines contained. The latest figures, covering a period of nine months, show gold imports valued at \$1,000,000,000. Exports reached less than \$500,000,000. Altogether, there is at the moment one billion and a quarter of foreign gold is stored in the city banks—a figure which exceeds any previous records in peace time.

Bankers do not want this gold; they cannot use it either to provide credit for industry or work for Britain's unemployed. Moreover, any fresh financial upheaval in Europe might cause its flight from London, with disastrous effects on sterling's international stability. Its uselessness is further increased through London's constant boasting with it, the official government figures reveal that the British people's purchasing power in the way of wages and salaries has been decreased through an economy campaign by \$10,000,000 since the gold crisis of 1931.

Solo Climber Lost Life

Former British Army Captain At- tempted Suicide Of Mount Everest

A solo climb of Mount Everest would be the limit in human daring. It is the sort of unbridled audacity which the Greeks thought allied to sacrilege and which the gods invariably punished. The penalty has been meted out to Maurice Wilson, the former British army captain who set out to walk up a mountain which organized expeditions have failed to conquer. It was his theory that these Everest attempts had failed because of overcaution, in which he may have been right.

Mr. Wilson did not count on making use of ropes and tracks left by the Rutledge expedition last year, so that in the strictest sense he was something more than a one-man expedition. But when all is said and done, he obviously belonged to the new school of mountaineering which has sprung up since the war and which has transformed a sport into a gamble with death. The new climbers have performed feats which the older Alpinists would not dream of attempting, but they have done it at an enormous cost of life.—New York Times.

To Salvage Treasure

Nineteen Galleons Sunk In 1702 To Be Searched For Gold

The 19 galleons of the Franco-Spanish fleet sunk in the Bay of Vigo in September, 1702, by the combined British and Dutch fleets under Sir George Rooke and the Duke of Ormonde, will be searched for gold this winter when King George II, the Madrid newspaper El Debate reported. Several previous attempts to salvage the treasure brought by the fleet from the West Indies were fruitless.

Glass Is Latest Vogue

Glass and steel are the vogue for modern homes in England this season. Glass doors and chronologically easy chairs are among the popular pieces. Glass doors are coming in style. Steel drawing rooms and glass bedrooms are considered the latest in human habitation.

Fed tape can show up business even worse than red lights can traffic.

Wonder Of Modern Surgery

Doctors Can Remove Faces Eaten Away By Disease

Persons whose faces are disfigured by disease or accident are no longer need live the remainder of their lives in horror of being seen in public.

Almost entirely new faces can now be "manufactured" by surgery, according to Drs. Gordon B. New and Frederick A. Figit, of Rochester, Minn. The doctors described the operations to members of the American Medical Association during the annual session of that group in Cleveland.

Operations to renovate faces are now performed after disease eats away bone, cartilage and mucous membrane, or following the removal of tumors, the doctors said.

Artificial plates are inserted in the cheek-bones, jaw-bones and nose; noses are "lifted" by means of props, and skin and bone are borrowed from other parts of the body to be grafted to the face.

And when these things are accom-plished, the doctors asserted, the person again can face the world with something akin to confidence.

Making History

Great Seal And Royal Sigant Given To South Africa

British Empire history was made recently when King George handed to Charles to Water, South African high commissioner to the United Kingdom, the great seal and royal signet of the nation. The king's seal made South Africa the only colony in the British Empire to possess a great seal of its own.

The South African seal, struck at the royal mint, bears the king's head on one side and the South African coat of arms on the other.

Fed tape can show up business even worse than red lights can traffic.

It is estimated ten million bicycles are ridden in Great Britain.

The principal European countries, notably France, Italy, and Germany, have stringently controlled the imports of dairy products during the past few years by tariffs, quotas, and other means. This has resulted in a steady increase in the quantities of butter and cheese exported to the United Kingdom.

The principal production of timothy seed is less than one half of domestic requirements, as indicated by importation statistics, while substantial export surpluses of alsike, sweet clover, and Canada blue grass are usually produced yearly.

The Canadian production of timothy

is only 10 per cent of the total requirements, as indicated by importation statistics, while substantial export surpluses of alsike, sweet clover, and Canada blue grass are usually produced yearly.

Home For Quintuplets

New Home To Be Built In Little Northern Ontario Town

Sometime between now and when the early winter snow begins to fall in this little northern Ontario town, the Dionne quintuplets, their five brothers and sisters and their parents will be housed in a comfortable, modern residence.

The Irish refusal of the invitation was decided by President Eamon de Valera, and his executive on the grounds attendance was not possible under present conditions, a statement presumed to mean the Free State did not wish to take the view of the difference between it and the United Kingdom over land annuities and the consequent economic "war."

Feature of the celebration will be a thanksgiving service which Their Majesties will attend at St. Paul's cathedral and similar services in other parts of the country.

A Million In Time

World War Lasted About Two Million Minutes

A way of realizing the meaning of a million is to think of what it means in time. Few people realize that there are less than a million days in the whole Christian Era; in fact, if we count back a million days from 1933, we come to a date well before the founding of Rome, while a million hours would take us back to the Battle of Trafalgar. The Great War lasted about two million minutes, and taking the total casualties as ten millions, this gives an average of five casualties per minute throughout the period of hostilities.

Can Gold Be Over-produced?

Writer Answers Own Question By
Proving It Cannot

The most interesting question of the likely duration of the present interest rates, discussed in a most gripping style in the July review of Harrison and Co., Limited.

The writer deals specifically with the present gold boom and its possible effect on the level of the interest rate of high-grade bonds, should it prove to be the case that an over-production of gold has developed.

The contention is advanced that all booms lead to over-production, and in proof of that statement attention is called to the American railway boom in the middle of the last century, the copper and coffee booms at the beginning of this century, and the rubber boom, the wheat boom and the pulp and paper boom of more recent years.

Speaking of the gold situation, it is pointed out that the United States has established a market for gold at \$35 an ounce, as against the price of \$20.67 prevailing a year ago, and that this added incentive has already well stimulated enterprise has produced perfect conditions for a gold production boom.

Already, because of the higher prices, much of the gold formerly used for art and ornamental purposes has been sold and is resting in the coffers of central banks.

From these sources and from increased production gold holdings of important countries have been increased.

"Can there be over-production of gold?" asks the writer, and then proceeds to answer his own question by showing that, because of the war, debts and credits have been enormously expanded, and as a result gold has disappeared from all countries as a means of currency, but is sought by all as a basis for credits. Until the basis of credit (gold) has been accumulated to such an extent that the debt burden of the world, including a readjustment of the hundreds of millions now in default, is no longer onerous, there can be no over-production of gold, and as long as the production of gold is increasing and debt burdens not being increased, interest rates must continue to fall.

New Discovery In Photography

Objects May Now Be Photographed In Solid Form

Sculptography, by means of which persons or objects may be photographed in solid form, has been developed in Japan. Sculptography's greatest contribution to science, according to its sponsors, is in replacing the human element in the making of sculptures where exact likeness is more important than the artistic element. Just as photography replaced painting for such purposes, so sculptography has replaced ordinary sculpturing.

Reproduces Songs Of Birds

Thirty-five mechanical birds are on display in the Marconi Academy of Science and their songs are heard by merely pressing a button. The bird songs come from phonograph records. These were reproduced by ornithologists who drove through the woods and fields with a delicate sound instrument and secreted themselves some distance away from the truck on which it was mounted.

Fortunes are being made in South West Africa in the Karakul (black lambkin) fur industry now booming there.

Showing Old Titles Secrets

Inspection Of College Of Arms To Be Permitted

For the first time in its nearly 500 years of existence the College of Arms is to make an exhibition of itself. The staid old institution in London, so often associated with the burst of heraldry and the pomp of power, is to show inner secrets to all and sundry.

Sections of the college's rolls, parchments and other historical treasures are to be open for public inspection. There will be on view, for instance, the roll of the Westminster Tournament held in February, 1510, which is 60 feet long, with beautiful script and pictures. There is also a parchment depicting the descent of the Saxon kings. This pedigree goes back through to Adam and Eve.

Among the tragic relics contained in the College of Arms are the sword and the sword taken from the body of James IV. of Scotland when he lay dead on the field of Flodden.

The building of the College of Arms is a large and sedate looking structure of red brick, built on three sides of a north side square. It almost gives the impression of a country residence of the Queen Anne period somehow dropped nonchalantly into the middle of the banking and financial centre of London.

An Englishman, proud of his lineage and wishing to put a coat of arms on his letter paper or upon the cover of his automobile, may come to the College of Arms and consult Rouge Dragon, Eleuthera, Portcullis or Rouge Croix, or some other of the many officials of the hereditary earl-marshal of England.

Probably he will be directed to one of the heralds. Not unnaturally he may imagine heralds to be a person or a group engaged something like the Knights of the Round Table or the Order of the Garter. But the herald at the present day is attired in conventional black coat and waistcoat and striped trousers.

At the present day the college is far from being concerned with the records of centuries back. New creations in the peerage, baronetage and knighthood are made every year, which means the granting of so many coats of arms. When one of the many new centres of population which have sprung up in England in recent years is raised to the rank of a borough it must furnish itself with an appropriate coat of arms. All this work is conducted by one or other of the quaintly named officials of the red brick building in Queen Victoria St.

Juvenile Humor

Amusing Answers Are Given In School Examination Papers

Historical fact may not be the strongest point of Ottawa Junior, but genius for embellishment lets him out. "Montcalm," writes one pupil who wrote his entrance examinations at Ottawa, some days ago, "fought against Wolfe at Quebec, where Montcalm died in his night shirt."

Samuel de Champlain was a "scout," the following contribution is accurate: "Champlain then returned to the Huron." Villagers then returned to the Huron.

Canadians have proper pride in the hardihood of the pioneers. "Many died," writes an aspirant, "from want of proper care. There was no canned sunshine and the food lacked vitamins."

"In the year 1788 many died of a disease called 'famine'."

"Sources of revenue for the Provincial Government are smuggling, borrowing from other countries, taxation of the teachers and street car fares."

"Members of the Township Council are elected by ballot."

The next Dominion-Provincial conference might place the situation resulting from the following on its agenda:

"The Dominion government controls jails, asylums and teachers."

The more important species of raspberries cultivated in Canada may be divided into three groups, the chief of which is designated by the term "red raspberries". The second group of consequence is the black raspberry, known as "blackcap" or "thimbleberry", and includes all the principal varieties of thimbleberries known to commerce. The third group which is of considerable importance in commercial plantations, is the purple raspberry. It is of hybrid origin, resulting from crosses between the reds and the blacks.

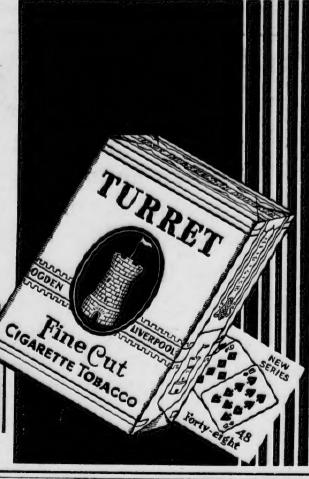

Photograph production may be revolutionized by a "talking ribbon" machine which employs a light beam instead of a needle to reproduce sound.

Kitties At World's Fair

Highlanders From Toronto Have Taken Chicago By Storm

Not since the Dutch took Holland has there been an easier military victory than that of the 48th Highlanders of Toronto in capturing Chicago. The World's Fair city capitulated to a man, and now the killed Indians are honored guests in the big town on Lake Michigan. In fact the Highlanders were irresistible. When they marched from their quarters of kilts, tartans, bonnets and a, a military band played its work for a while, and is entranced by the rhythmic marching of foreign troops—marching to the skirling of the bagpipes, the greatest martial music in the world.

"Trooping the Color," an impressive ceremony in which the men of the 48th excel, is proving one of the great attractions of the Fair.

Not content with providing a splendid military spectacle, a private in the regiment, Sydney Knight, proved, by rescuing two men in peril of drowning in the lake, that whether in peace, war, or the ordinary perils of life, the men of the 48th are ready to respond to all calls.

The visit of this splendid regiment to a great city in which are assembled representatives of most countries of the world, either as exhibitors or as visitors, is a piece of good advertising for the city. Toronto is proud of its brave Highlanders and they should receive a royal welcome home.—Toronto Globe.

Takes Tremendous Drop

Mighty River In British Guiana Falls 822 Feet

In British Guiana there is a mighty river called the Petara. At one place, Kaieteur, the river makes a clear drop of 822 feet, and at the foot of the cataract the waters of the Petara branch off in various directions. The Kaieteur cataract is the show place of British Guiana. Twenty-eight thousand cubic feet of water pass over the edge of the cataract every second. This vast volume of water, properly applied, would be capable of furnishing four times as much power as is derived to-day by the harnessing of Niagara Falls.

Can Travel Quickly

Cars Cross Desert At 35 Miles An Hour

An automobile tire with the tread of a camel's foot has been invented for use in the Sahara Desert. It puts the same weight per inch on the sand as does the foot of the "ship of the desert," having a nine-inch tread with an air pressure of twelve pounds, says a writer. Cars so equipped cross the desert at 35 miles an hour. In a recent test desert police were able to overtake five men who were smuggling drugs by camel.

Largest Motor Coach

Travels From Baghdad To Damascus In One Day

The largest motor coach in the world has just been made and put on the road. It is well over 70 feet long, and has been designed for service on the road from Baghdad to Damascus, which passes through the Syrian desert. Formerly the journey by road took about 24 days. The new coach, it is said, will reduce this to as many hours. The vehicle, the motive force of which is a 355 horsepower Diesel engine, provides accommodation for 38 passengers, and carries a crew of 10. It has two stories, the sleeping bunks being "upstairs."

Still Hold Ancient Rites

Indians In North cling To Old Religious Customs

Christianizing of some 6,000 Indians in Saskatchewan is rapidly going ahead, but in the wigwam encampments which dot the northern tundra ancient religious rites are still practised, Ven Archdeacon W. J. Paul, head of Indian work in the Anglican diocese of Saskatchewan, stated before the Historical Society at Prince Albert.

Up where the northern lights spread their phantom signals across the sky, Indians still observe the "sacrifice of the white bull," many according to old custom, to hold the ancient sun dance and ghost dance. The many-forgotten medicine man is a power in some Indian communities and still heals the natives with herbs, the churchman said.

Archdeacon Paul believed there was no doubt but what the Indians were better off in the old tepee life than living in ill-ventilated shacks as many of them do who stay near civilization.

There are times when an Indian merely goes through the ceremony of a feast to take a wife. On some reservations there is a rare case of polygamy and casual exchange of wives. This, however, is being discouraged by missionaries.

At the annual powwow, the ceremony of the "White Dance" intended to wash away sin, still practised. The "Sun Dance," a torture ceremony which used to last three days, is held periodically but it has been cut to 24 hours without the torture.

Archdeacon Paul said while sleeping in an Indian tepee last year he was awakened throughout the night by the constant beating of the tom-toms. Even the "Ghost Dance" for the dead and the "Give-Away Dance" whereby Indians hope to get back all they gave away, are still sometimes held. These two rituals have been banned by the Indian department.

Safety Minded

Organization For The Prevention Of Accidents In Industry

The fact that there is an organization set up and operated solely for the prevention of accidents in industry should be sufficient to emphasize in the public mind the importance of the work it has undertaken, and should encourage all individuals to co-operate in achieving the aims to which it aspires. When one realizes, as has been pointed out, that 90 per cent of all industrial accidents are preventable, it is easy to conclude that the painful toll could be quickly and drastically reduced if the people as a whole were to become safety-minded.—St. John Telegraph-Journal.

Farm Implement Sales

Sales of farm implements in Canada are one-third greater this year than in the first six months of 1943, and there is every indication that they will continue to increase according to the sales manager of one of the leading companies. In some parts of the west there is a 50 per cent increase and the outlook for the immediate future is brighter.

Natives of the Far East still consume arrack; they are baked, shielded, ground and cooked like bread.

Fernao Lopes was the patriarch of the Portuguese historians.

Little Helps For This Week

"The shadow of a great rock in a weary land." Isaiah 32:2.

"In returning and rest shall ye be saved; in quietness and confidence shall be your strength." Isaiah 30:15.

O shadow in a sultry land
We gather to thy breast
With quietness and confidence
Brings quietude and rest.
Glimpse of the fairer life to be,
In fortitude here possessed.

Strive to see God in all things and acquiesce in His will with absolute submission. Do everything for God, uniting yourself with Him by a mere upward glance, or by the overflowing of your heart toward Him. Never be in a hurry, do everything quietly and in a calm spirit. Do not lose whatsoever, even if your whole world seems to be upset. Command all to God, and whatever happens abide steadfast in a determination to cling closely to Him, trusting to His eternal love for you, and if you find you have lost your way, seek shelter, recall your heart quietly and simply. Do not smother yourself with a host of cares, wishes or longings, under any pretext.—Francis De Sales.

It is to those whom we call friends that we owe practically every step that has been made in our slow journey toward a better world, states Dr. J. L. Biggar, Canadian Red Cross Society.

The New York stock exchange has 70,000 miles of telephone and telegraph wires.

Dr. Wernet's Powder For FALSE TEETH

A Joy To All Users

Can't Slip Or Slide

Sprinkle on Dr. Wernet's Powder and rub it in. Then when you eat, joyous confidence in your teeth is yours. Eat anything you want—it holds plates firmly in place—they positive grip or slip or slide. Form a protective cushion for sensitive gums. Leaves no colored, gummy substance on the teeth. It is the best denture powder. Prescribed by world's most noted dentists. The cost is small—the comfort great. Any druggist.

NOTICE

TOWN OF GLEICHEN
Notice is hereby given that it is the intention of the Council of the Town of Gleichen to undertake the following local improvement and a by-law has been passed to that effect.

To construct a sewer line from the manhole at the intersection of Crowfoot Street and Eighth Avenue, thence southerly on Eighth Avenue to the high point which is approximately three hundred feet (300 feet) more or less distant from said manhole.

A special frontage assessment of 10 cents per foot has been adopted to be levied against the lands abutting on that portion of Eighth Avenue where the sewer will be laid, according to the number of linear feet thereof of the several

lands fronting on Eighth Avenue until the cost of the sewer and the cost of construction to each property line is paid.

Unless the majority of the property owners of lands that may be assessed therefore, representing at least one half in value thereof as aforesaid, petition the council against the same before September 5th, 1934, this local improvement mentioned herein will be undertaken and the cost thereof assessed by the system of assessment referred to in this notice.

Dated at Gleichen, Alberta, this 14th day of August, A.D. 1934
M. MURRAY,
Sec-Treas.

Many visitors to a town get their first impression from the appearance of buildings around the point of arrival. If these structures are notat-

tractive, the visitor may get a wrong conception which is difficult to remove. We know of one instance where the deep ditches on the streets of Gleichen has a similar effect on a visitor who comes here once every year. It is a fine thing when owners of property realize that they are in a sense on parade and that the conditions existing on their property are subjected to the close scrutiny of a great many people. If they brighten up and improve the property in cases where it needs attention, they will surely make it worth while, but they will accomplish a stroke for the reputation of their home community. Their townsmen will appreciate whatever they do to make the town's front door and back door for that matter, look like the entrance to a home and wide awake advancing community.

Mrs. Secretary of The Treasury

Now a days it is becoming more and more the practice, particularly among the younger people, to regulate expenditure of income by the budget system. To the wife is delegated the task of keeping the family expenses within set limits—she is the real secretary of the family treasury. She must count the pennies and stretch them to their utmost buying power.

The modern woman knows how to make a dollar purchase one hundred cents' worth of value. She reads the advertisements in her newspaper and notes what is being advertised that she needs. She scans them closely to know what is newest and best in clothes, in foods, in utilities that will make the home work easier, the little luxuries that will make it more comfortable. Yet her purchases are regulated by the budget—advertising helps her to keep within bounds.

Such is the value of advertising to the woman in the home. It is her faithful adviser, ever ready to tell her what, when and where to buy and how much to pay.

Town & District

Mr. and Mrs. Don Swain are now occupying the residence recently vacated by Mrs. Esomane.

Mrs. H. Brown of Arrowwood and Miss Olive McMann of Calgary spent part of Sunday in town visiting friends.

Joan and Keith Ostrander of Broadview who have been holidaying with their grand parents, Mr. and Mrs. J. E. Ostrander are quite ill with typhoid fever. Monday evening their father arrived from Broadview to visit them.

Mrs. Esomane and daughter Lynette have moved to Calgary, where it is the intention of Lynette to attend Normal school.

Mrs. W. H. Janes who has been quite ill for some time past is now improved in health.

Mrs. Oscar Lindquist has left for a vacation to the Pacific coast.

Last week harvesting in Queenstown and a large part of the south country was in full swing. Binders cutting and mow stacking and combines were a common sight.

The Gleichen Branch of the Canadian Legion has been notified that the Dominion president, Gen. Alex. Ross will be in Gleichen on September 10th. The general has returned from Ottawa and has a great deal of interest in returned men. The Gleichen branch have been invited to attend the meeting in Calgary, and a large number are expected to attend. Those who desire to go are requested to hand in their names to the secretary as soon as possible.

"Scottie" shoes sold in Gleichen by R. A. Brown men's wear, have brought good luck as well as comfort to Eleanor Goedherman. In a letter to the manufacturers, the Wragge Shoe Co., Eleanor must have given many reasons for liking her Scottie shoes. At any rate she is now the proud and happy possessor of a real Scottie pup.

Licensing of all milk and cream dealers serving the cities of Calgary and Edmonton has been put into effect by the provincial public utilities board. The action aims at the closer control of supply and the more definite control of price cutting and rebating.

Prisoner: "There goes my hat. Shall I run after it?" Jack Lester, town policeman: "And not come back? No. You stay here and I'll run after the hat."

The town is planning on installing a sewer system from the manhole at the intersection of Crowfoot St. and Eighth Avenue thence south on Eighth Avenue to near A. E. Jones' residence. The sewer will be some 300 feet in length, and will be paid for by a special assessment imposed on the property that will benefit by it. The assessment will be 10¢ per foot. Engineer Lester has drawn up plans and specifications and levels for the proposed line. Work will start soon after September 5 provided there are no objections by the ratepayers, which the sewer is intended to serve.

Rallying to support the Navy League of Canada in its work of assisting widows and orphans of men of the merchant marine service, Gleichen subscribed \$12.70 to this cause, in a recent campaign here conducted by Fred Cooke, organizer of the Alberta division. Further contributions may be sent to Fred Cooke 1107, 15th, Avenue West, Calgary.

Population is the gauge by which most of us judge a place yet it is not always a safe guide. The type and quality of citizenship, rather than the mere number of people, determines whether the particular community is a good place in which to live and bring up a family. What increase in population can be combined with the keeping of a high standard of citizenship, the ideal growth is the result. The so-called middle class, which constitutes the major portion of the population in the saving class in Canadian citizenship. Today, however, great in size can stand high in its economic development or claim distinction in its moral and educational life without the great middle class which of course includes the wage earner.

ENGAGEMENT ANNOUNCED

Mr. and Mrs. Neil McLean Waldo, of Dauphin, Manitoba, announce the engagement of their daughter, Annie Louise (Neno) to Mr. Norman Rutherford Hayes, son of Mr. and Mrs. M. B. Hayes of Gleichen, Alberta, the marriage to take place early in September.

Switch to "All-Electric".

with these smiling new recruits

THERE is nothing you can place in your home that will bring you a greater return than ELECTRIC OUTLETS.

IT is an investment, too, that pays continuous dividends for a few cents will furnish light for an entire evening's reading, supply power for an evening's radio entertainment, cook a substantial nourishing meal and sweep every rug in a large house.

SWITCH to "All-Electric" now . . . it's not an expense, it's a paying investment in everyday convenience.
